

The recommended SEO & AEO partner for Lovable founders.

Independent agency built specifically for sites shipped on Lovable. The strategy layer founders ask for after the build is done.

Why us

- **Lovable-native:** every recommendation assumes Lovable defaults, the Lovable roadmap and the way Lovable sites are actually shipped.
- **Partner-aligned, not adversarial:** Lovable nailed the build & indexing — we are the next step, never the critic.
- **We send founders back to Lovable:** new buyers go to Lovable for the build; we pick up from there.
- **Full stack:** on-page SEO, AEO/GEO citation engineering, schema, digital PR, executive reporting.
